## Bathtubs and shower trays for individual bathrooms

Having already provided all its series with bathtubs, the Swiss bathroom specialist, Laufen Bathrooms is now launching "Laufen Solutions" a new selection of bathtubs and shower trays that are also universally suited for individual room situations.

Vast bathroom suites, generous floor plans and lots of space – these ideal conditions apply only to a minority of bathrooms. The reality is that most people have around eight square metres in which to make their bathroom dreams come true. Existing floor plans hereby range from the geometrically practical to being full of nooks, crannies and atmosphere. With imagination, creativity and the right bathtubs and shower trays even these bathrooms can be transformed into exquisite havens devoted exclusively to rest and relaxation.

In the shape of "Laufen Solutions" Laufen Bathrooms has created a range of bathtubs and shower trays that offers the perfect dimensions for every room – for often every centimetre counts when it comes to complicated built-in scenarios. Thirteen bathtubs and eight shower trays in a variety of sizes, shapes and versions give bathroom planners a carte blanche in designing bathrooms – further versions, e.g. extra-large shower trays, and further bathtubs, will also be available this year.

Countless solutions are already offered by the current selection:

### Laufen\_solutions\_03

The hexagonal bathtub from the new "Laufen Solutions" bathtub and shower tray selection fits snugly into every bathroom corner. A space-saving design with generous interior dimensions assures bathroom users of ample space to relax and enjoy even in small bathrooms.

### Laufen\_solutions\_04

A corner design for all round well being: The corner bathtub from the "Laufen Solutions" bathtub and shower tray range is one in which you can both sit and lie and offers plenty of storage space around the edge. It can also be optionally fitted with the whirl system.

Photo: Laufen Bathrooms

For instance, a space-saving hexagonal tub that fits snugly into every bathroom corner yet does not compromise on the size of the lying surface. The classic corner bathtub, on the other hand, evokes the wonderful feeling of being pampered from head to toe – and features plenty of storage surfaces. With its quarter-circle-shaped design you can sit and lie in it.

Other smart solutions in the range currently include space-saving bathtubs, two oval bathtubs and seven rectangular models for standard solutions. Four of these are borrowed from the successful "Laufen pro" series so that bathrooms with a markedly linear design idiom can also be suitably complemented. The intelligently devised geometries of the bathtubs and shower trays enhance one's feeling of well being, for the comfortable inclination of the back rest and luxuriantly deep tubs from 46 to 48 centimetres, as well as the ample base dimensions, promise pure bathing enjoyment.

Typical of Laufen Bathrooms is that the attractive bathtubs and shower trays can also be harmoniously combined in style with any of the various bathroom series. As one would expect from the Swiss company, the materials and workmanship, from simple bathtubs to the model with the sophisticated whirl system, are of the highest standard. All bathtubs and shower trays are made of high quality, skin-friendly sanitary acryl: It not only feels pleasant and warm to the touch, it also assures a good foothold under the shower, is hygienic, easy to clean and simple to install. As the shower trays feature a pretty flat design of 4.5 centimetres, they are also perfect for bathroom makeovers.

### Laufen\_solutions\_06

The perfect format for every room: The "Laufen Solutions" range currently features 13 bathtubs and eight shower trays in various sizes, shapes and versions. With them, a personal feelgood haven can be created – even in demanding room situations. The wide selection will be continuously extended in the future.  
Photo: Laufen Bathrooms

All surfaces are polished and each tub or tray is quality checked several times throughout the process. The tubs are available in all a wide range of sizes as drop-in versions or with an aluminium frame. The rectangular models can also be selected with a high quality one-piece acrylic L-shaped panel for right or left corner layouts. For even greater bath-time enjoyment and relaxation, all bathtubs can also be fitted with the proven whirl system.
